### **Osram offers the SiCompact range of floodlights for the efficient LED lighting of surfaces and areas**

**High quality workmanship, state-of-the-art lighting technology and a high IP66 protection rating make SiCompact LED floodlights from Osram the premier choice for standard lighting tasks outdoors while simultaneously providing economical, low-maintenance and energy-efficient lighting solutions.**

Osram continues the success story of the tried-and-trusted Siteco floodlight classic with these new LED versions, focusing on maximum reliability, simple installation and high quality. Available in three construction sizes with rated luminous flux from 4,000lm to 23,800lm, the SiCompact family is ideal for a variety of lighting tasks around buildings. Precisely the right light is provided for buildings, facades, advertising walls, parking lots and worksites, as well as utilisation planes in trade and commerce.

The range of floodlights ensures efficient operation with up to 120 lm/W and scores with a service life of 60,000 hours (L70/B50). The robust construction also convinces – a screwless housing of diecast aluminium, UV-resistant polyester coating, safety glass cover and special sealing system (sealed for life / IP66) easily withstand temperature fluctuations, variable humidity and tough ambient conditions. The lighting technology generates asymmetric light distribution on the utilisation plane with an illuminated surface up to five times larger than standard products. Thanks to pre-assembled brackets and connection cables the luminaires are mounted quickly and simply, offering ideal preconditions for replacing conventional projectors.
